

JETPILOT

INDUSTRY LEADING INNOVATION & TECHNOLOGY

025 GLOBAL SUMMER

**CLOSE OFF
WEDNESDAY
24 JULY 2024**

THE BEST IS YET TO COME

Every year we get better and better, innovating new products and improving our old ones. And this year is no different. The range that we have developed for 2025 is the best one yet.

Our Sustainability program is getting larger and larger every year, with more vests using Ecoprene, all of our wetsuits using Limestone Neoprene and our new RPET fabric for our dry bags. We are looking towards the future and want to ensure

that outdoors that we love, will be there for generations to come.

We have seen great strides in our Pro-Tech race protection gear, incorporating our patented back protection into our life vests. Safety has always been at the core of Jetpilot and any innovation to keep our customers / team riders safe is a worthwhile investment.

The range that we have developed for 2025 is the best one yet.

Our life vest range has seen several updates to ensure

that we are providing the best possible fits for our customers. We want everyone to feel comfortable and safe out on the water.

We are introducing a brand new life vest this season, the 3SXTY. This vest uses our innovations from the Hyperflex vest, to create expandable sections, allowing for a supremely comfortable fit and allows for bending and folding when you are sitting on a PWC.

The list goes on, read along and we are sure that you will agree, big things are coming in the 2025 season!

TECHNOLOGY, INNOVATIONS & PATENTS

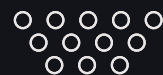

All of our products that we produce are jam packed with features and innovations that we pride ourselves on. We are always seeking to create the best quality products that we can and be at the forefront of the industry.

Over the years we have developed countless innovations and procured multiple patents. We invest in our products so that you can be confident you are protected when you are out on the water.

PRO-TECH
IMPACT PROTECTION SYSTEM

HIDDEN SUPERGRIP
PATENTED

SAFETY IS OUR #1 PRIORITY

WE'RE FOR THE WATER SEEKERS & WORK MAKERS

Those who are Fueled by Friday and outdoor adventures, either out in the sun or near the water. We religiously spend our time out in Mother Nature and regardless of whether at a cable park, on a boat, on a watercraft or on the jobsite, we're on the journey to continually be the best versions of ourselves, challenge ourselves to innovate and be at the top of our game in every area of our business.

We make clothing and water sports products that are designed to

last. We avoid fast fashion with an emphasis on quality, durability and long lifecycle. Our Quality System has been written using ISO 9001:2015 for Quality and AS/NZS4801:2001 for Safety and ISO 14001:2015 for Environmental Impact.

We're on the journey to continually be the best versions of ourselves

We use B Certified sustainable

packaging that is reusable, compostable and recyclable. Our global head office utilises solar energy which energises the office and distribution warehouse (and also energises us!). We use ocean freight wherever possible, and look to ensure containers are full prior to shipping.

ECOPRENE

INSANELY LIGHTWEIGHT, DURABLE AND SOFT OUTER SHELL
MADE FROM **RECYCLED** PLASTIC BOTTLES

 **30% LIGHTER** THAN TRADITIONAL NEOPRENE

TRIPLE LAYER CONSTRUCTION

Ecoprene is a 3 layer fabric, designed to have the smallest environmental impact as possible.

OUTER LAYER

Recycled polyester jersey

RECYCLED RPET

RECYCLED POLYETHYLENE TEREPHTHALATE

As a part of our sustainability goals, we have changed as much of our bags as possible to rPET, or better known as recycled bottles. Taking what was a single use plastic and creating durable and long lasting products is an integral part to the Jetpilot lifecycle.

LIFE VESTS

WHAT MAKES OUR VESTS THE BEST

We pride ourselves on creating the best quality products and leading the charge with new innovations. For more than 35 years we have been at the forefront of high performance life vests.

We have developed a range of life vests for the 2025 season that encompass everything that we have learnt over the years and we are excited to present some of the most advanced life vests available on the market today.

We have collaborated with some of the best wakeboarders in the world, spanning all facets of the sport from cable and winch to boat and from free riders to competitors. We have

listened to their feedback and designed a range that not only lets them perform and function at their peaks, but keep them safe whilst they do it.

We also have collaborated with some of the best PWC racers in the world, both stand up and sit down. Our new Pro-Tech innovations, have once again propelled Jetpilot as the leaders in the industry.

We are at the forefront of high performance life vests

Not to be outdone by the professionals, our range of vests designed for the “average” man can’t be beaten. We take all the learnings and

innovations from our high performance vests and create feature packed vests, at reasonable price points for the rest of us.

In all of our vests designs we always hold 2 core elements: safety and function. We want you to enjoy yourself out on the water and not have a vest that is holding you back or causing discomfort. We also want to see you come home safe.

We’ve said it already, but 2025 is our best range yet. We have innovated some truly amazing features and we can’t wait for you to get your hands on them and get out onto the water.

SAFETY

CE & ISO 50N APPROVED
All of our vests have passed rigorous safety tests to ensure we are always providing you the best safety. We have engineered ISO and CGA approved vests for international markets.

PRO-TECH
Our range of Pro-Tech safety gear has evolved, with removable CE level 2 approved back braces in our RX life vests. Whether it’s back protection, shin-guards, helmets or goggles, we have you covered.

TRUSTED
The people you depend on (Surf Life Saving) to keep you safe depend on Jetpilot to keep them safe. Built tough and dependable to work in the toughest situations.

FUNCTION

HIDDEN SUPER GRIP HANDLES
Our world-first patented Hidden Supergrip technology allows our vests to be used in multiple scenarios, from PWC riding to wakeboarding. Simply tuck the handles away when they aren’t needed, so they don’t get caught or drag in the water.

ANATOMICAL FIT
We have worked with countless riders over the years to create vests that have the best possible fits. We continuously create adjustments based on feedback from the people using our gear the most.

HYPERFLEX
Our Hyperflex paneling was created to stop your life vests bulging / riding up when sitting on a PWC or in a boat. The hyperflex panels allow the vest to bend and fold with your body allowing a comfortable fit whether standing or sitting.

WAKE

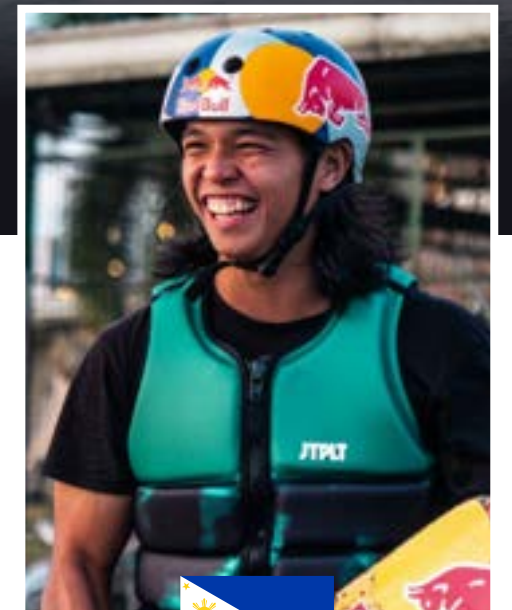

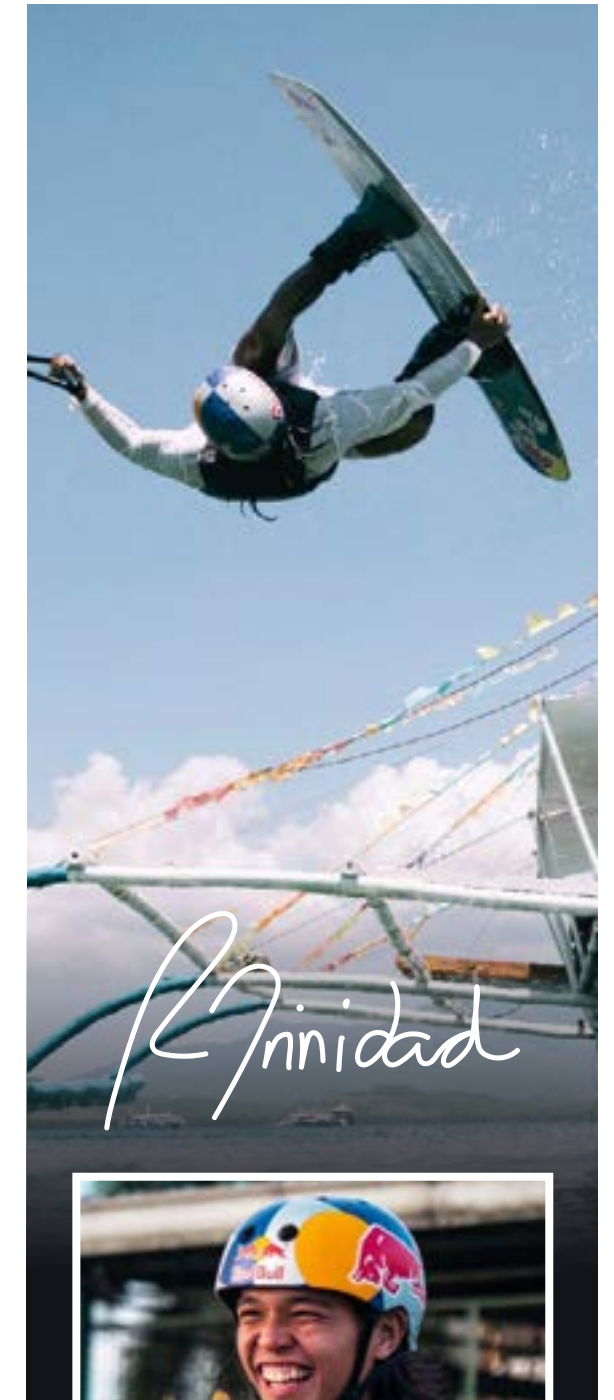

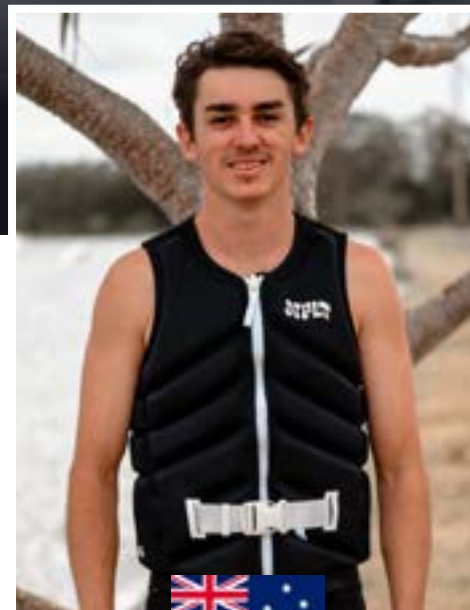

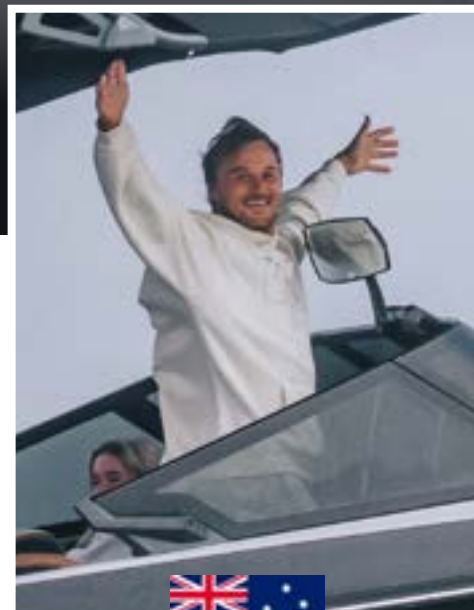

PEAK PERFORMANCE

Whether at a cable park, behind a boat or winching in the streets, our wake vests are designed to keep you safe without getting in your way.

LIFE VESTS

SIGNATURE SERIES VESTS

When you need the best, get the vests made and worn by the best.

CE PRO TECH

JETPILOT PATENTED **INDUSTRY LEADING RACE PROTECTION**

Introducing our Patented Built In/Removable Pro-Tech Level 2 CE Back Brace, engineered with three-tiered protection layers for optimal rider safety. Crafted to meet the PWC race standards of IJSBA and UIM Aqua Bike, our Pro-Tech CE Back Brace is a testament to our commitment to being the leaders in World Champion Race Technology. Designed to integrate with our RX Vault collection of life vests, this back brace sets a new benchmark in protective gear.

Certified to CE Level 2, our back brace doubles the level of impact protection, effectively halving the force hitting the body to below 9KN compared to the 18KN threshold of Level 1 certification.

The outer exoskeleton shell system is crafted from high-density polypropylene plastic, it acts as a

first layer of defence which ensures the initial force is deflected away, sparing you from the brunt of the impact. Meanwhile an internal dual foam construction, combines an EVA layer with a XPE foam backing that is reinforced with closed foam cell technology.

These layers work in harmony through the compression and deformation of cell walls, the exoskeleton shell flexes and bends to seamlessly deflect and distribute energy, ensuring a resilient shield against impact on the water.

Meticulously race engineered and tested by world-class PWC riders for unrivalled safety and comfort, we prioritise rider feedback, refining our product to meet the highest standards, ensuring you navigate the water with confidence.

RACE CERTIFIED BY IJSAB AND UIM

DIY Custom **VEST PRINTS**

Non Melting Heat Transfer Proof Foam Technology with High Bond Custom Number Panel

We have designed a new foam that allows our customers to easily apply custom race numbers and names. With a higher melting point than traditional materials, it allows heat press transfers without affecting the buoyancy of the vest. We have also placed an Ecoprene panel on our side entry vests to allow better application of the heat transferred prints.

HIGHER MELTING POINT TECHNOLOGY

Allows for perfect heat transfer prints.

MXSTORE
COMAU

Although any heat transfer printer will be able to customise your vest, we recommend MX Store. We have used them for previous projects and have always had amazing customer service as well as prompt and professional outcomes.

FEATURES

CONEHEAD TECHNOLOGY™

Conehead Technology™ allows us to build a lightweight helmet with a more comfortable feel, without compromising your safety.

Impact force directed towards head.
Head pushing in opposite direction.

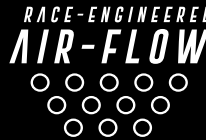

On impact the cones compress, directing the energy and force sideways within the foam. As the base of the cones compress, they gradually slow down the head.

Impact force directed towards head.
Head pushing in opposite direction.

PERFORATED AIRPRENE

Internal padding has been ergonomically designed to keep your head safe in advanced comfort. Our Perforated Airprene liner increases water release and draining, reducing drying time.

DUAL DOT- ECE 22-05 APPROVED
